

- A/
11. (New) The method of claim 10, further comprising the steps of:
receiving a response to the request from the radio network;
generating a resource reservation protocol message based on the contents of the response; and
sending the resource reservation protocol message to the local user's terminal equipment.
12. (New) The method of claim 10, further comprising the steps of:
receiving a trigger that initiates the generation of a resource reservation protocol path message; and
sending the resource reservation protocol path message to the user's terminal equipment.
13. (New) A method for a gateway general packet radio service support node comprising the steps of:
including internet protocol quality of service information in packet data protocol context; and
transforming, by the gateway general packet radio service support node, quality of service related signaling according to an internet protocol into signaling according a resource reservation protocol, and vice versa.
14. (New) A mobile terminal comprising:
a first interface to a local user's terminal equipment;
a second interface to a radio network;
a terminating unit for terminating resource reservation protocol; and
a translation unit for transforming a resource reservation protocol message into a packet data protocol message and vice versa.
